TEERDHA

ABOUT US

Teerdha isn't just another travel booking app. We're your seamless travel companion, dedicated to transforming the way you explore the world. We believe that every journey, from the bustling cityscape to the serene countryside, deserves effortless planning and unforgettable experiences.

Our Mission:

To empower travelers with a unified platform for comprehensive travel booking and personalized travel experiences.

What Makes Us Different:

All-in-One Convenience:

Book train, flight, bus, cab, and hotel reservations with a single click. No more hopping between multiple apps!

Unbeatable Deals:

We scour the web for the best fares and exclusive offers, ensuring you get the most value for your travel budget.

Smart Search & Filters:

Refine your search with advanced filters based on price, travel time and more. Find your perfect travel option in seconds!

Seamless Booking:

Intuitive interface and secure payment gateways make booking a breeze. Sit back, relax, and let Teerdha handle the rest.

24/7 Support:

Our friendly customer service team is always here to assist you, no matter where your journey takes you.

More than just Bookings:

Treedha is more than just a booking platform. We're passionate about travel and committed to providing you with the resources you need to make the most of your adventures.

Build a Travel Community: Connect with fellow travelers, share experiences, and create lasting memories.

Join the Treedha Family:

Download the Treedha app today and unlock a world of seamless travel possibilities.

Username

Password

LOGIN

Overview:

The Teerdha login allows users to authenticate and gain access to the application's features. Login credentials are validated against a user database to ensure authorized access.

Login Process:

The login process consists of the following steps:

User enters username and password:

The login interface provides fields for users to enter their username and password.

Validation:

The application server receives the entered credentials and validates them against the user database.

Authentication:

If the credentials are valid, the user is authenticated and granted access to the application.

Error handling:

If the credentials are invalid, an appropriate error message is displayed to the user.

Login Interface:

Username field:

This field should accept any alphanumeric characters, underscores. Case sensitivity should be consistent with how usernames are stored in the database.

Password field:

This field should be obscured with asterisks or dots for security. Minimum password length requirements should be enforced (e.g., 8 characters). Consider implementing optional features like password complexity requirements and password strength meters.

Submit button: Clicking this button triggers the validation and authentication process.

Forgot password link:

This link should redirect the user to a password reset page.

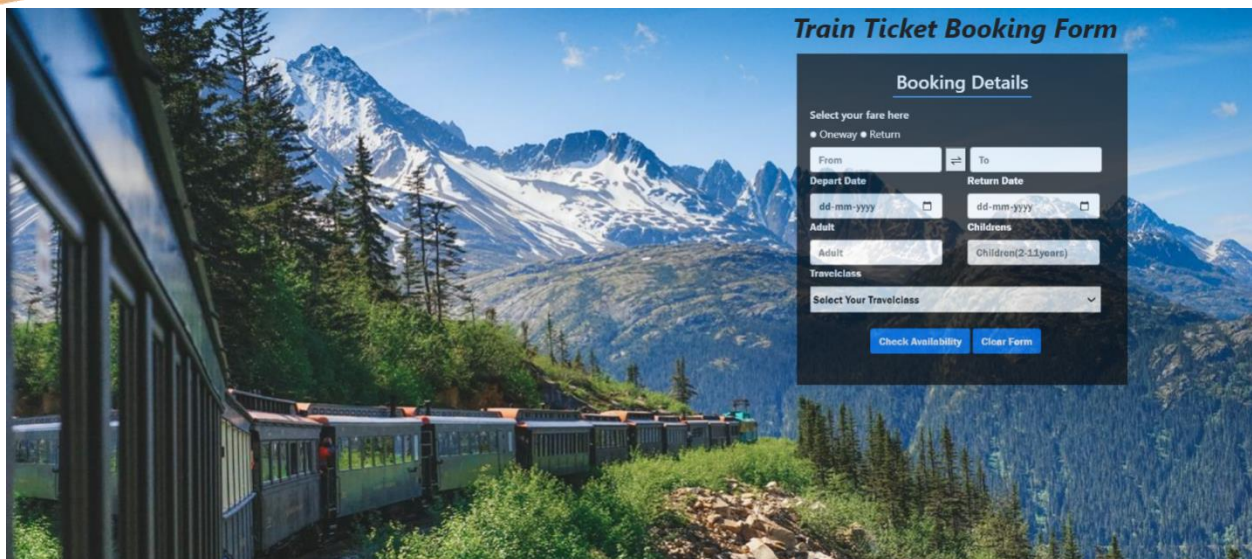

Additional Notes:

Consider implementing social login options (e.g., Google, Facebook) for easier and more secure login.

Provide clear error messages for invalid credentials and other login issues.

Offer a "remember me" functionality to save user credentials locally for future logins.

TRAIN TICKET BOOKING

Overview:

This Application can provides a Train Ticket Booking, its features, functionalities, and intended usage. This application aims to simplify and streamline the process of booking train tickets, offering a user-friendly and convenient experience.

Features:

Search & Book Trains: Find trains based on travel date, origin, destination, and preferred travel class.

View real-time availability and fares for various trains.

Manage Bookings: Book tickets for multiple passengers, choose preferred seats and manage existing bookings with options to modify or cancel.

Payment Gateway Integration: Securely process payments through various online payment methods like credit/debit cards, net banking, and e-wallets.

Confirmation & E-tickets: Receive immediate booking confirmations and download e-tickets for paperless travel.

PNR Status & Tracking: Track the confirmation status of your booked ticket and view live train information.

Account Management: Create a user account to save passenger details and booking preferences for future use.

Promotional Offers & Discounts: Stay updated on ongoing promotional offers and discounts on train tickets.

Usage:

This application is intended for anyone looking to book train tickets conveniently.

Individuals: Book tickets for personal travel or business trips.

Families & Groups: Book tickets for groups traveling together with flexible options for managing passenger details.

BUS TICKET BOOKING

Overview:

This document outlines the features, functionality, and usage of the teerdha bus ticket booking. This application allows users to conveniently search for, book, and manage bus tickets online.

Features:

Search and Book Tickets:

Easily search for available bus journeys by specifying origin, destination, and date.

View real-time bus schedules and fares from various operators.

Filter search results by preferred bus operators and price range.

Select seats from an interactive bus layout diagram.

Manage Bookings:

View upcoming and past bookings under one account.

Modify or cancel bookings seamlessly within the app.

Download and print e-tickets for easy boarding.

Additional Features:

Receive notifications for booking confirmations, schedule changes, and boarding reminders.

Access exclusive deals and discounts on certain routes and operators.

Rate and review your travel experience for other users.

Functionality:

The application functions through a user-friendly interface :

Search: Enter trip details (origin, destination, date) to view available journeys.

List View: Browse through search results displayed with key information like operators, fares, departure/arrival times.

Details View: Access detailed information about specific journeys, including bus type, seating map, and operator reviews.

Booking: Select your desired trip, choose seats, provide passenger information, and complete payment securely.

Account: Manage bookings, update profile details, and access travel history.

Usage:

In the Search section, enter your origin, destination, and desired travel date.

Browse through the available journeys and select the one that best suits your needs.

Review the journey details and choose your preferred seats from the interactive bus layout.

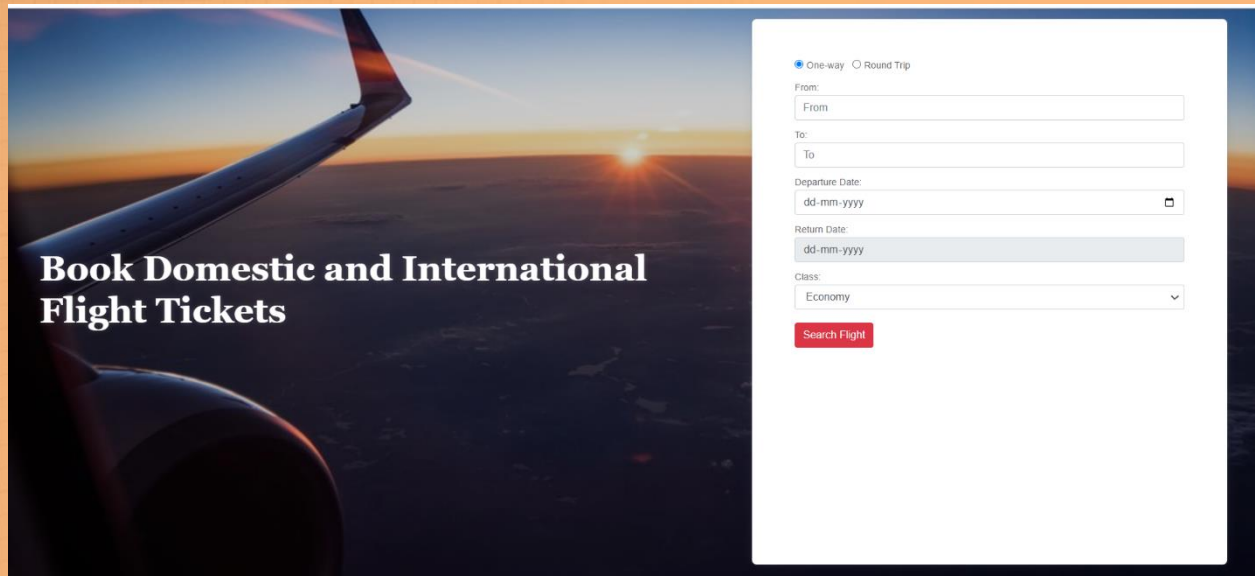

Enter passenger information and select your preferred payment method.

Review your booking details and confirm the purchase.

Receive an e-ticket confirmation in the app and manage your booking via the Account section.

On the travel date, show your e-ticket to the bus conductor for boarding.

FLIGHT TICKET BOOKING

Overview:

This document provides an overview of a flight ticket booking, outlining its features, functionality, and use cases. It aims to inform users and developers about the capabilities of the application and guide them in utilizing it effectively.

Features:

Flight Search: Search for flights based on various criteria like origin, destination, travel dates, number of passengers, and preferred airlines.

Price Comparison: Compare prices from different airlines to find the best deal.

Filter Options: Filter search results by factors like price range, flight duration, layover times, departure/arrival times, and preferred airlines/alliances.

Real-time Availability: View real-time seat availability for various flights and fare classes.

Multiple Fare Classes: Choose from various fare classes like Economy, Business, and First Class based on your budget and travel needs.

Manage Bookings: Manage existing bookings, view booking details and cancel tickets.

Mobile Boarding Pass: Access your boarding pass directly on your smartphone after completing check-in.

Multiple Payment Options: Pay for your tickets securely using various payment methods like credit cards, debit cards, and online wallets.

Functionality:

The application utilizes an integrated search engine that connects to multiple travel databases and airline APIs to retrieve flight information and pricing.

Users can search for flights, compare prices, and choose the best option based on their specific needs.

The booking process is streamlined and secure, allowing users to complete their reservations in a few simple steps.

The application also provides various tools and features to manage bookings, access essential travel information.

Usage:

This application caters to a broad range of users, including:

Leisure travelers: Individuals planning vacation trips or weekend getaways.

Business travelers: Professionals frequenting various destinations for work purposes.

Students: Traveling for educational purposes or internships.

Anyone seeking convenient and affordable flight booking solutions.

Benefits:

Save time and money by comparing prices and finding the best deals.

Book flights conveniently and securely from anywhere with an internet connection.

Manage your bookings efficiently and access essential travel information.

Enjoy a seamless and personalized travel experience.

HOTEL BOOKING

Overview:

This document provides an overview of a hotel booking application, outlining its features, functionalities, and usage.

Features:

Hotel Search:

Users can search for hotels by destination, dates, number of guests, and room type.

Advanced filters allow users to narrow down their search based on budget ratings, and other criteria.

Detailed Hotel Information:

Each hotel listing includes descriptions, photos, guest reviews, and other relevant information.

Room categories and prices are clearly displayed, along with availability for selected dates.

Secure Booking:

Users can book rooms directly through the application with a secure payment gateway.

Reservation confirmation emails are sent immediately.

Functionality:

Search and Explore:

Users can browse hotels based on their desired criteria and explore detailed information about each property.

Compare and Choose:

Users can compare different hotels side-by-side to find the best option for their needs.

Book and Manage:

Users can seamlessly book rooms and manage their reservations directly through the application.

Stay Informed:

Users receive real-time updates on their booking and can access essential information about their chosen hotel.

Provide Feedback:

Users can leave reviews and share their experiences with other travelers.

Usage:

This application can be used by anyone looking to book a hotel room anywhere in the world. Individuals, families, and groups can find suitable accommodations for business trips, vacations, or any other travel purpose.

CABS BOOKING

Overview:

This document provides an overview of a typical cabs booking application, its features, functionality, and usage for both passengers and drivers.

Features:

Location tracking:

Uses GPS to identify the passenger's current location and suggest nearby cabs.

Ride booking:

Passengers can enter their pick-up and drop-off points, choose a vehicle type, estimate the fare, and book a ride instantly.

Fare estimation:

Provides an estimated fare before booking a ride, based on distance, time, and vehicle type.

Multiple payment options:

Offers various payment methods, including cash, digital wallets, and credit cards.

Ride history and rating:

Passengers can view past rides, track their spending, and rate drivers and their experience.

In-app communication:

Passengers can chat with drivers directly through the app for any clarifications or updates.

Functionality:

The application essentially functions as a two-sided platform connecting passengers with available cabs. Passengers submit ride requests, while drivers receive notifications and can choose to accept them.

Usage:

Enter your pick-up and drop-off location, choose a vehicle type, and book a ride.

Track the cab's arrival and stay updated on its progress.

Pay for the ride using your preferred payment method.

Rate the driver and your overall experience.

TRAVEL INSURANCE

Travel Insurance offers insurance protection while you travel. Travel Insurance may be called by different names by insurance companies. It is important for you to check and understand whether the policy covers domestic travel or overseas travel or both. Travel Insurance protects you and/or family against travel related accidents, unexpected medical expenditure during travel, losses such as baggage loss, loss of passport etc and interruption or delays in flights or delayed arrival of baggage etc.

Travel Insurance normally offers cover only during a specific period of travel. However, some insurance companies may offer various combinations of protection to cater to the specific needs of customers e.g., there could be a special policy for Corporate Frequent Travellers etc.

- Medical Expenses with or without cashless facility (most travel insurance products offer cashless facility)
- Personal Accident

- Loss of Baggage
- Delay in Baggage arrival
- Loss of Passport
- Travel Delay
- Repatriation
- Transportation of dead body etc.
